PROFESSIONAL SUMMARY

Laravel developer with 4+ years of experience building scalable, secure web applications and REST APIs for clients in the USA, UK and Europe. Strong in MySQL/PostgreSQL optimization, queue and event-driven systems, payment and third-party integrations, and Livewire/React/Vue front ends. Certified in Laravel security and full-stack development.

TECHNICAL SKILLS

Backend: PHP, Laravel, REST APIs, Eloquent ORM, Queues & Horizon, Events/Broadcasting, Webhooks
Frontend: Livewire, Blade, React.js, Vue.js, Next.js, TypeScript, JavaScript, jQuery, HTML5, CSS3
Databases: MySQL, PostgreSQL, MariaDB, Redis, Query Optimization, Multi-Tenancy
Security: JWT, OAuth2, Socialite, Fortify (2FA), Spatie RBAC, Policies & Gates, Rate Limiting
Integrations: Stripe, PayPal, Twilio, Pusher, Third-Party APIs
Testing & Docs: Pest, Unit/Feature Testing, Postman, Swagger/OpenAPI
DevOps & Tools: AWS (EC2, S3, RDS), Docker, GitHub Actions, GitLab CI, Nginx, Laravel Forge, Linux, Git, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer | Moka and CO (Remote, USA) **Sep 2026 – Present**
- Built a support ticketing system to log, track and resolve customer and franchise issues in one place.
- Developed a franchise management portal to manage multiple store locations and franchisees from a single platform.

Senior Laravel Developer | Globosoft Technologies (James Cargo Warehousing, UK) **Aug 2025 – Jul 2026**
- Integrated 3PL logistics APIs and webhooks for shipments, inventory and tracking, cutting manual effort by 70%.
- Monitored queues with Laravel Horizon (45% better reliability/uptime); improved large-dataset performance by 45% with chunking and cursor pagination.
- Built real-time Livewire order-tracking dashboards; wrote Pest tests (65% fewer production regressions) and upgraded projects to current Laravel versions.

Senior Laravel Developer | GIS PLUS **Feb 2024 – Aug 2025**
- Built database-per-tenant multi-tenancy (Stancl Tenancy) with dedicated subdomains for a real-estate ERP.
- Implemented RBAC (Spatie Permissions, policies, React.js UI), improving access control and security by 76%.
- Delivered JWT-secured, Swagger-documented REST APIs with Laravel Echo/Pusher notifications and Twilio SMS alerts.
- Integrated Stripe for property bookings (60% reliability gain) and Leaflet.js maps; optimized queries with eager loading and caching.

Full Stack Laravel Developer | Wise 360 Solutions **Feb 2023 – Jan 2024**
- Developed JWT-authenticated, Swagger-documented REST APIs; request throttling improved reliability and security by 30%.
- Optimized MySQL relationships with eager loading and caching; built Blade/React.js interfaces and Google OAuth login (Socialite).

Full Stack Laravel Developer | Veva Solution (Remote, Portugal) **Aug 2022 – Jan 2023**
- Owned backend for vendor and client apps and an admin dashboard, with REST APIs serving React Native clients.
- Cut notification delays by 40% with Broadcasting, Events/Listeners and Pusher; integrated Stripe, PayPal and local gateways; deployed on AWS EC2/S3 with CI/CD.

CERTIFICATIONS

- **Master Full-Stack Web Development with Laravel & PHP** – Board Infinity via Coursera **Oct 2026**
- **Laravel Protections** – Infosec via Coursera **Oct 2026**
- **Laravel Additional Security** – Infosec via Coursera **Oct 2026**

EDUCATION

MSc in Computer Science | Abbottabad University of Science and Technology (AUST) **2016 – 2018**
